

Skullgard Caps and Hats feature heavy-duty construction for use in steel mills and other heavy industries where elevated temperatures are common. Skullgard Caps and Hats meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1 1997, Class G (electrical—low voltage) (formerly Class A).

⚠ WARNING

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard-size suspension with standard-size helmet). Use only MSA suspensions on an MSA helmet. **Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.**
